23.000	309.024	327.781	465.019	450.739
24.000	310.667	333.515	469.814	454.546

- This table shows how prediction error changes from the first forecast step to the last forecast step.
- It is especially useful for explaining whether a model degrades smoothly or sharply as it predicts further into the future.
- Lower is better. This is the average absolute difference between prediction and truth.
