23.000	329.744	326.376	427.714	411.333
24.000	330.499	332.216	428.412	412.816

- This table shows how prediction error changes from the first forecast step to the last forecast step.
- It is especially useful for explaining whether a model degrades smoothly or sharply as it predicts further into the future.
- Lower is better. This is the average absolute difference between prediction and truth.
